Homework 1 Report　　　b04501127 土木四 凌于凱

Enviroment
OS: Archlinux
Compiler: g++ (GCC) 8.2.1

how to execute
**make** to compile cpp file and generate execute file(train, test, cal_acc).
./train iteration model_init.txt seq_model_0x.txt model_0x.txt to train model_0x.
./test modellist.txt testing_data.txt result.txt to classify the testing data.
./cal_acc result1.txt   testing_answer.txt acc.txt to calculate accuracy.

Summary

　　可以發現正確率隨著 iteration 的上升也跟著上升，直到大概執行 150 次時達到收斂，正確率最高值位在 iteration = 141 − 161 間，大約為 0.86。
